ABOUT ME

Results-driven Web Developer and Database Engineer with a strong background in designing, developing, and optimizing scalable web applications and database systems. Skilled in SQL, PHP, JavaScript, and database administration with hands-on experience in front-end and back-end development. Proven ability to enhance system performance, ensure data integrity, and deliver secure, high-performance solutions. Passionate about problem-solving, automation, and building efficient, user-focused digital products.
Also certified in NEBOSH IGC, demonstrating strong awareness of workplace safety and risk management in IT environments and Oil refinery
